

HPTN
HIV Prevention
Trials Network

The HIV Prevention Trials Network (HPTN)

The HIV Prevention Trials Network (HPTN) is dedicated to the discovery and development of new and innovative research strategies to reduce the acquisition and transmission of HIV.

Main
Areas
of
Focus

Integrated Strategies
(Behavioral, Structural,
& Biomedical)

New PrEP Options

Community Engagement

Community participation and engagement are critical in the successful conduct of scientific research. There is mutual benefit to communities and researchers when both parties work together throughout the research process.

We work with:

**Women &
Adolescents**

**Men Who Have
Sex with Men**

**Transgender
People**

**People Who
Inject Drugs**

Some of our studies include....

The AMP Studies

Evaluating the use of broadly neutralizing antibodies (bnAbs) to reduce HIV infection in HIV-uninfected men, women, and transgender people who have sex with men
ampstudy.org

HPTN o84 (The LIFE Study)

Comparing the efficacy and safety of injections and oral tablets as pre-exposure prophylaxis (PrEP) to prevent HIV in women
o84life.org

HPTN o83

Comparing the efficacy and safety of oral and injectable PrEP in HIV uninfected cisgender MSM and transgender women who have sex with men
giveprepashot.org
